

Master Comparison Table: All Network Topologies

Mesh Topology	Ring Topology	Bus Topology	Star Topology
Nodes are interconnected via point-to-point links.	Nodes form a closed circular loop.	Nodes connect to a single backbone cable.	Nodes connect to a central hub or switch.
$N(N-1)/2$ links (Full Mesh).	N links.	N+1 link segments (including backbone).	N links (to central node).
Extremely High	Low	Very Low	Medium
Very High	Very Low	Low	High
